Table of Contents

- ✓ 1. Nutrition Basics
- ✓ 2. Macronutrients
- ✓ 3. Micronutrients
- ✓ 4. Calories Explained
- ✓ 5. Hydration
- ✓ 6. Healthy Eating Rules

1. Nutrition Basics

- Choose mostly whole foods.
- Eat balanced meals.
- Meet your daily protein goal.
- Include fruits and vegetables.
- Avoid excessive processed foods.

■ Dietitian Tip

Consistency matters more than perfection.

2. Macronutrients

Macronutrient	Role	Examples
Protein	Muscle repair	Eggs, Chicken, Paneer, Fish
Carbohydrates	Energy	Rice, Oats, Potato, Fruits
Healthy Fats	Hormones	Nuts, Seeds, Olive Oil

3. Micronutrients

- Eat colorful vegetables.
- Include vitamin C sources.
- Get enough calcium.
- Ensure adequate iron intake.
- Sunlight supports vitamin D.

■ Dietitian Tip
Food variety improves micronutrient intake.

4. Calories Explained

Goal	Calories
Bulking	Calorie surplus
Maintenance	Calories in = calories out
Fat Loss	Calorie deficit

5. Hydration

- Drink 2.5–3.5 L water daily.
- Increase intake during exercise.
- Limit sugary drinks.

■ Dietitian Tip
Hydration supports performance and recovery.

6. Healthy Eating Rules

- Don't skip breakfast if it suits your routine.
- Include protein in every meal.
- Plan meals ahead.
- Practice portion control.

■ Dietitian Tip
Build habits you can maintain long term.

Frequently Asked Questions

Q: Should I count calories?

A: It helps if you have a specific body-composition goal.

Q: Can I eat carbs at night?

A: Yes. Total daily intake matters more than timing.

Q: How much protein do I need?

A: Most active people benefit from 1.6–2.2 g/kg/day.

Q: Is cheating on diet okay?

A: Occasional treats are fine in moderation.
