Intermediate Workout Guide

Version 2.0 • Part A

AI Fitness Trainer Knowledge Base (LangChain + RAG)

■ **Premium Cover Illustration Placeholder:** Intermediate lifter performing compound lifts.

Table of Contents

- ✓ 1. 1. Who is an Intermediate Lifter?
- ✓ 2. 2. Progressive Overload
- ✓ 3. 3. Hypertrophy Principles
- ✓ 4. 4. Training Volume
- ✓ 5. 5. Intensity (RPE & RIR)
- ✓ 6. 6. Intermediate Gym Rules

1. Who is an Intermediate Lifter?

- Has 6–24 months of consistent gym experience.
- Knows correct exercise form.
- Can follow structured training plans.
- Tracks workouts and recovery.
- Focuses on muscle growth and strength together.

■ Trainer Tip

Don't change your workout every week. Stay consistent for 6–8 weeks.

■ **Illustration:** Intermediate athlete training

2. Progressive Overload

- Increase weight gradually (2.5–5%).
- Add repetitions before increasing weight.
- Improve technique first.
- Track performance in a workout log.
- Balance overload with recovery.

■ **Trainer Tip**
Small weekly improvements lead to long-term progress.

■ **Illustration:** Progress graph with increasing strength

3–5. Training Principles

Concept	Recommendation
Hypertrophy	6–12 reps, controlled tempo
Training Volume	10–20 sets per muscle/week
Intensity	Work near failure while maintaining form
RPE	Target 7–9 for main lifts
RIR	Leave 1–3 reps in reserve most sets

6. Intermediate Gym Rules

- Prioritize recovery as much as training.
- Use a structured split (PPL or Upper/Lower).
- Don't sacrifice form for heavier weights.
- Deload every 6–10 weeks if needed.
- Record strength progression weekly.

■ **Trainer Tip**
Recovery is where muscles grow—not during the workout.

FITGENIE AI

Intermediate Workout Guide

Version 2.0 • Part B

Push Day

Focus: Chest • Shoulders • Triceps

Exercise	Sets × Reps	Rest
Primary Compound Lift	4 × 6–8	120 sec
Accessory Lift	3 × 8–10	90 sec
Isolation Exercise	3 × 12–15	60 sec
Finisher	2 × 15–20	45 sec

■ **Trainer Tip:** Progress gradually and maintain excellent form.

■ **Illustration Placeholder:** Featured exercise for this workout.

Pull Day

Focus: Back • Rear Delts • Biceps

Exercise	Sets × Reps	Rest
Primary Compound Lift	4 × 6–8	120 sec
Accessory Lift	3 × 8–10	90 sec
Isolation Exercise	3 × 12–15	60 sec
Finisher	2 × 15–20	45 sec

■ **Trainer Tip:** Progress gradually and maintain excellent form.

■ **Illustration Placeholder:** Featured exercise for this workout.

Leg Day

Focus: Quads • Hamstrings • Glutes • Calves

Exercise	Sets × Reps	Rest
Primary Compound Lift	4 × 6–8	120 sec
Accessory Lift	3 × 8–10	90 sec
Isolation Exercise	3 × 12–15	60 sec
Finisher	2 × 15–20	45 sec

■ **Trainer Tip:** Progress gradually and maintain excellent form.

■ **Illustration Placeholder:** Featured exercise for this workout.

Upper Body

Focus: Balanced upper-body strength & hypertrophy

Exercise	Sets × Reps	Rest
Primary Compound Lift	4 × 6–8	120 sec
Accessory Lift	3 × 8–10	90 sec
Isolation Exercise	3 × 12–15	60 sec
Finisher	2 × 15–20	45 sec

- Trainer Tip: Progress gradually and maintain excellent form.
- Illustration Placeholder: Featured exercise for this workout.

Lower Body

Focus: Strength, stability & posterior chain

Exercise	Sets × Reps	Rest
Primary Compound Lift	4 × 6–8	120 sec
Accessory Lift	3 × 8–10	90 sec
Isolation Exercise	3 × 12–15	60 sec
Finisher	2 × 15–20	45 sec

- Trainer Tip: Progress gradually and maintain excellent form.
- Illustration Placeholder: Featured exercise for this workout.

Advanced Training Techniques

Technique	Purpose	When to Use
Superset	Increase intensity	Accessory exercises
Drop Set	Maximize muscle fatigue	Last set only
Rest-Pause	Extend a set safely	Experienced lifters
Tempo Training	Improve control	Hypertrophy blocks

Weekly Planner

Day	Workout	Done
Mon	Push	■
Tue	Pull	■
Wed	Legs	■
Thu	Rest / Cardio	■
Fri	Upper	■
Sat	Lower	■
Sun	Recovery	■

FITGENIE AI

Intermediate Workout Guide

Version 2.0 • Part C

1. Deload Week

- Reduce training volume by 40–50%.
- Use lighter weights while maintaining technique.
- Focus on mobility and recovery.
- Resume progressive overload after the deload.

2. Recovery & Sleep

- Sleep 7–9 hours every night.
- Consume enough protein daily.
- Stretch after each workout.
- Manage stress and stay hydrated.

3. Nutrition & Supplement Timing

Topic	Recommendation
Protein	1.6–2.2 g/kg body weight
Carbohydrates	3–6 g/kg depending on training
Creatine	3–5 g daily
Hydration	2.5–4 L water/day
Pre-workout Meal	60–90 min before training
Post-workout Meal	Protein + carbohydrates within 2 hours

4. Monthly Progress Tracker

Week	Body Weight	Main Lift PR	Recovery	Notes
1				
2				
3				
4				

5. Frequently Asked Questions

Q: How often should I deload?

A: Every 6–10 weeks or when fatigue accumulates.

Q: Can I train to failure every set?

A: No. Reserve failure for selected exercises.

Q: Should I change my workout often?

A: No. Follow a program consistently for 6–8 weeks.

Q: Do supplements replace food?

A: No. They support an already balanced diet.
